PROFESSIONAL SUMMARY

Detail-oriented Software Developer with 2 years of professional experience at Technos Systems Engineering Services, specializing in full-stack web development, HRMS & payroll systems, IoT integrations, and automation solutions. Proven ability to design scalable systems, optimize database performance, and collaborate with cross-functional teams to deliver reliable, secure, and maintainable applications.

CORE COMPETENCIES

- **Full-Stack Web Development:** PHP (CodeIgniter), JavaScript, HTML, CSS, jQuery, Bootstrap, Tailwind CSS
- **Backend & Business Logic Implementation:** Payroll computation, attendance tracking, overtime & leave processing, validation rules, approval workflows
- **Reporting & Data Handling:** HR reports, management dashboards, Excel export, data accuracy & traceability
- **Machine Learning Exposure:** YOLO v8 model training, dataset preparation, labeling, and annotation
- **AI-Assisted Development & Productivity:** Prompt engineering, code review, debugging, optimization using ChatGPT, Gemini, Claude, DeepSeek

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript, Python, HTML, CSS
- **Frameworks & Libraries:** CodeIgniter, jQuery, Bootstrap, Tailwind CSS
- **Databases:** MySQL, MariaDB, SQLite.
- **Tools & Platforms:** Git, GitHub, REST APIs, AI-assisted development tools (ChatGPT, Gemini, Claude, DeepSeek)
- **Domains:** HRMS & Payroll Systems, IoT Integration, Automation, E-commerce, Machine Learning (YOLO v8)

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Technos Systems Engineering Services (Jan 2024 – Present)

- **Payroll & HRMS System:** Developed and implemented a full-stack HRMS using PHP (CodeIgniter), JavaScript, and MySQL, handling payroll computation logic, attendance time rules, leave and overtime processing, role-based access control, approval workflows, audit logging, and normalized database design with report generation.
- **Canteen Management System:** Developed a distributed full-stack system composed of an **offline Python-based canteen application** for barcode meal stub scanning and a **PHP (CodeIgniter) web-based admin platform**, implementing bidirectional data synchronization, employee and meal stub configuration, dashboard analytics, and cloud-to-offline data propagation.
- **TPR Medical E-commerce System:** Designed and built a responsive full-stack e-commerce application using PHP, JavaScript, HTML/CSS, and MySQL, implementing product catalog management, order processing, authentication, admin inventory controls, and secure data handling.
- **Machine Learning / AI (YOLO v8):** Designed and trained YOLO v8 object detection models using Python for projects including waste classification, medicine dispensing validation, eggplant quality assessment, road crack detection and classification, and sensor-assisted object identification integrated with ultrasonic data.

EDUCATION

Bachelor of Science in Computer Science
Cavite State University – Silang Campus (2019 – 2023)
